

NORTHLAND

## COMPLETING A DREAM

Northland was delivered in November 2017. Reflecting her American owner's very specific requirements, she is a custom Burger designed by De Basto Designs.

# INTRODUCING NORTHLAND

A 103'-6" masterpiece of collaboration. An owner's dream. The artistry of De Basto Designs. Burger's craftsmanship. Contemporary. Built for long-range expeditions. Designed to stand the test of time.

NORTHLAND is the result of a wonderful partnership between owner, designer and builder.

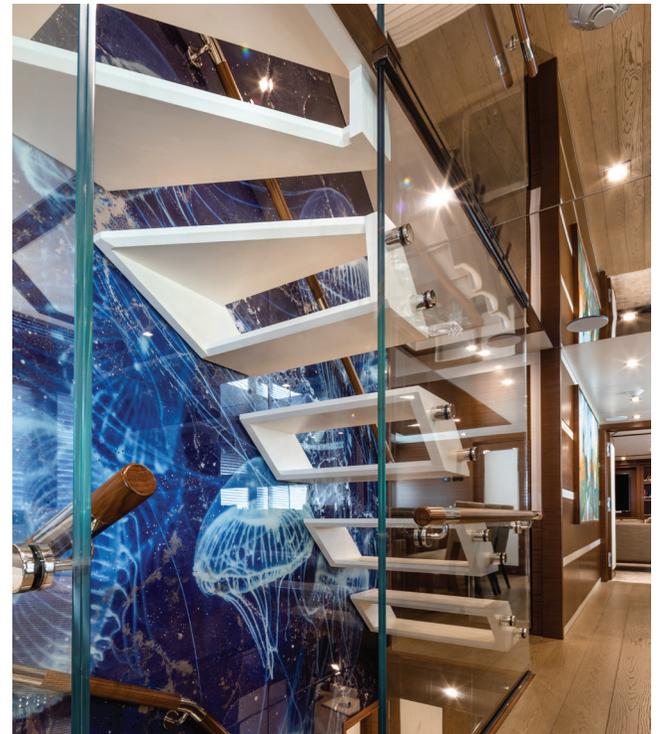

# A MODERN CLASSIC

Burger's experienced engineers and craftsmen built NORTHLAND at the company's modern shipyard in Manitowoc, Wisconsin. A true classic, NORTHLAND features a steel hull and aluminum superstructure, a modern interior, expansive open areas and a dedicated fishing cockpit.

NORTHLAND'S interior, with its exquisite contemporary details, was crafted at Burger's one-of-a-kind, on-site joinery facility.

Together, award-winning De Basto Designs and Burger expertly executed the owner's vision, which is called NORTHLAND.

# TODAY'S BURGER. TOMORROW'S INSPIRATION.

NORTHLAND — functional and stylish — provides her owner the excitement of adventure and the comforts of home. Upon developing the concept for NORTHLAND, the owner and De Basto Designs searched for a builder they could trust to bring life to this exceptional design. They found that partner in Burger, one of the oldest shipbuilders in North America, a shipyard uniquely capable of delivering an inspirational standard for the future.
